

Ameen Alalimi

JUNIOR WEB DEVELOPER

Sanaa, Yemen  +967 777235077 ameenalalimi170@gmail.com [github.com](#) [LinkedIn](#) [My website](#)

SUMMARY

Junior Web Developer specializing in Laravel and modern frontend design. A proactive problem-solver and continuous learner dedicated to writing clean, scalable code and delivering high-performance web applications.

PROJECTS

Car Spare Parts Management Platform

- Developed a fully dynamic company website with an admin dashboard to manage content, sections, and website information easily.
- Built a categorized spare parts management system with product organization such as engine parts, brake systems, filters, and more, including direct ordering through WhatsApp.
- Implemented a blog and article system with categories to improve SEO performance and increase website visibility on search engines.

Mihnati Service Marketplace Platform

- Developed a cross-platform Flutter/Firebase application connecting craftsmen with customers as a graduation project for an IT Diploma at the German College.
- Integrated Firebase for real-time synchronization, secure authentication, and live job request management.
- Designed responsive UI/UX workflows with onboarding, service management, and smooth state handling for seamless user experience.
